FOR PARENTS / CARERS OF PUPILS IN HOCKNEY CLASS at Pillowell CP School

Advice for Child to Self-Isolate for 10 Days

Dear Parents,

We have been made aware that we have a confirmed positive case of coronavirus (COVID-19) at Pillowell School. This has been detected with an PCR test. This person is in Hockney Class.

We have followed the national guidance and, following a risk assessment with Public Health England (PHE) advisers, have identified that your child has been in close contact with the individual who has had a positive test result for coronavirus (COVID-19). In line with the national guidance, your child must stay at home and self-isolate until **15th July at 23:59 hrs. They can return to school on Friday 16th July 2021.**

If your child is well at the end of this period of self-isolation then they can return to their usual activities and attend school as normal on the 16th July.

If any other pupil or adults test positive for COVID 19 following today, then the period of self isolation for the whole bubble will need to continue for a further 10 days after the last point of contact. The last point of contact will be today 7th July.

Mr Forster will be providing online learning via *Google Classroom* tomorrow. If Mr Forster becomes poorly, then regrettably this would cease to be the case. His email address is MrForster@pillowell.gloucs.sch.uk

Siblings

Siblings of children in other classes at the school should attend school as normal. I understand that this may have a repercussion regarding childcare, which I understand. It may be that you decide to keep your other child/ren at home.

If you have to keep siblings away from school because of childcare issues, we cannot provide remote learning.

Other members of your household can continue normal activities, provided your child does not develop symptoms within the 10 day self-isolation period.

Office

This week we may also find it difficult to answer the telephone in the school office. Please be patient if telephoning the school. Emails will be monitored during office hours on:

admin@pillowell.gloucs.sch.uk

If there is an emergency, please call
01594 510270 Blakeney School
01452 750373 Walmore Hill School

Please be vigilant, and do not hesitate to contact me directly if you have a concern.

Take care,

Kind regards,

Brett Stevenson

Headteacher

For more information, please see the guidance for contacts of people with confirmed coronavirus (COVID-19) infection who do not live with the person:

<https://www.gov.uk/government/publications/guidance-for-contacts-of-people-with-possible-or-confirmed-coronavirus-covid-19-infection-who-do-not-live-with-the-person>

What to do if your child develops symptoms of coronavirus (COVID 19)

Having been identified as a close contact, if your child then develops symptoms of coronavirus (COVID-19), they should remain at home for at least 10 days from the date when their symptoms appeared. Symptoms of coronavirus (COVID-19) are a new, continuous cough, or a high temperature, or a loss of, or change in, their normal sense of taste or smell (anosmia). Anyone with symptoms will be eligible for a PCR test - this is the type of test that is normally available and can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.

People who do not have symptoms or have not tested positive using a Lateral Flow Device should not request a PCR test unless this has been specifically requested by Public Health England or the local authority.

All other household members who remain well must stay at home and not leave the house for 10 days. This includes anyone in your 'Support Bubble'.

The household isolation period includes the day the first person in your household's symptoms started (or the day their test was taken if they did not have symptoms) and the next 10 full days. This means that if, for example, your 10 day isolation period starts on the 15th of the month, your isolation period ends at 23:59 hrs on the 25th and you can return to your normal routine.

Household members should not go to work, school or public areas, and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period. If that is not possible, anyone with symptoms should try and stay as far away as possible from vulnerable members of your household.

For more information, please read PHE's 'Stay at Home' guidance: <https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance/stay-at-home-guidance-for-households-with-possible-coronavirus-covid-19-infection>

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop coronavirus (COVID-19) spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with coronavirus (COVID-19):

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
